Project Progress Report

Farm2Market
An online Farmers Marketplace

Prepared By
Team Forerunners

Name	Student ID	Section
Chowdhury Nabil Ahmed	0242310005341011	E2
MD. Shardul Rahman Turjo	0242310005341263	
MD. Sajib Ahammad	0242310005341473	

1. Implemented Features

Feature	Description	Status
User Registration	Register as Farmer or Buyer.	Completed
User Login & Logout	Secure authentication system.	Completed
Profile Management	View and update profile info.	Completed
Add Product	Farmers add agricultural products.	Completed
Update Product	Edit stock, price, and details.	Completed
Delete Product	Remove listed products.	Not Completed
View Orders	Farmers view placed orders.	Not Completed
Browse Products	Guests/Buyers browse listings.	Completed
Search Products	Search by name or category.	Partially Completed
Add to Cart	Buyers add products to cart.	Completed
Update Cart	Modify items in shopping cart.	Completed
Place Order	Buyers place an order.	Not Completed
Product Review	Rate and review products.	Not Completed
Admin Features	Manage registered users.	Completed
Manage Categories	Admin manages product categories.	Completed

2. Mapping to SRS Requirements

Requirement ID	Requirement Name	Priority	Files / Components Involved
FR-1	User Registration	High	f2m_app/views.py (register_view), templates/F2M/register.html
FR-2	User Login & Logout	High	f2m_app/views.py (login_view, logout_view)
FR-3	Profile Management	Medium	f2m_app/views.py (profile_view), templates/F2M/profile.html
FR-4	Add Product	High	f2m_app/views.py (farmer_dashboard_view), f2m_app/models.py
FR-5	Update Product	High	f2m_app/views.py (edit_product_view), templates/F2M/edit_product.html
FR-8	Browse Products	High	f2m_app/views.py (product_list_view), templates/F2M/products.html
FR-9	Search Products	High	f2m_app/views.py (product_list_view category filtering)
FR-10	Add to Cart	High	f2m_app/views.py (add_to_cart_view), f2m_app/models.py (CartItem)
FR-11	Update Cart	High	f2m_app/views.py (update_cart_view), templates/F2M/cart.html
FR-12	Admin Features	High	Farm2Market/admin.py (Django Admin Site)
FR-13	Manage Categories	High	f2m_app/models.py (Category registered in admin)

3. Testing Plan

Test ID	Test steps	Test Data	Expected Output	Test Status
TC01	Register Farmer with valid data	Role: Farmer, Farm: "Nabil Farm"	User created, redirect to login	Pass
TC02	Register Buyer with valid data	Role: Buyer, Address: "Dhaka"	User created, redirect to login	Pass
TC03	Register with existing username	Username: "nabil0203"	Error: "Username already exists"	Pass
TC04	Login with correct password	Correct credentials	Redirect to home/dashboard	Pass
TC05	Login with incorrect password	Incorrect credentials	Error: "Invalid username/password"	Pass
TC06	Logout from active session	Click Logout	Session terminated, redirect home	Pass
TC07	Update Profile bio	New bio text	Profile displays updated bio	Pass
TC08	View role-specific profile	Farmer/Buyer account	Farmer sees farm info; Buyer doesn't	Pass
TC09	Farmer adds new product	Name: "Mango", Qty: 20	Item appears in product list	Pass
TC10	Add product empty fields	Skip farm location/name	Error: "Fields are required"	Pass
TC11	Update product stock	Change 20 -> 50	New stock reflected in DB	Pass
TC12	Update product price	Change $5 -> $10	UI shows updated price $10	Pass
TC13	Delete listed product	Click Delete	Item removed from listings	Failed
TC14	Browse all products	Visit listing page	10+ items displayed correctly	Pass
TC15	Search by Category	Select "Fruits"	Only Fruit products displayed	Pass
TC16	Search by Name	Input "Apple"	Only Apple products displayed	Failed

TC17	Add item to cart	Click "Add to Cart"	Success message; cart updated	Pass
TC18	Add out-of-stock item	Item with 0 stock	Error: "Out of stock"	Pass
TC19	Increase item qty in cart	Click '+'	Quantity increases, price updates	Pass
TC20	Decrease item qty to zero	Click '-'	Item removed from cart	Pass
TC21	Remove button in cart	Click 'Remove'	Item immediately removed	Pass
TC22	Click Place Order	Finalize cart	Create order record in DB	Failed
TC23	Select Payment Method	Choose Payment method	Order saved with status	Failed
TC24	Track order status	View 'My Orders'	Status shows "Pending"	Failed
TC25	Submit Product Review	Rating: 5, "Good"	Review appears on product page	Failed
TC26	Admin deletes a user	Admin panel	User cannot login anymore	Pass
TC27	Admin adds new category	Name: "Organic"	"Organic" appears in filter list	Pass
TC28	Monitor total transactions	Admin Dashboard	Shows total sales volume	Failed
TC29	Buyer accesses farmer dash	Direct URL visit	"Permission Denied" message	Pass
TC31	Add product to new category	Select "Organic"	Product correctly linked to category	Pass
TC32	Exceed stock in cart	Attempt qty > stock	Warning: "Not enough stock"	Pass
TC33	Update buyer address	Change "Dhaka" to "Sylhet"	Profile reflections new address	Pass
TC34	Register invalid email	Email: "invalid-email"	Error: "Enter a valid email"	Pass
TC35	Admin edits product category	Switch "Fruits" to "Veg"	Change reflected in public listing	Pass

4. Individual Contribution

Md. Shardul Rahman Turjo - Backend Logic

Modules / Features:

- Authentication - Registration, login, role-based redirect (Farmer/Buyer)
- Farmer Dashboard - Add, view, manage products with image upload
- Product Edit - Update with ownership validation
- Product Listing - Public browsing with category filtering
- Cart System - Add/update/remove items, stock validation, subtotal
- Profile View - Role detection, stats, avatar initials
- URL Routing - 11 routes for core functionalities

Files:

- views.py - Backend logic
- urls.py - All routes
- admin.py - Model registration

Key Challenges:

- Role-based access control using hasattr()
- Cleaning up incomplete registrations
- Enforcing cart stock limits

Learned:

- Using related_name (example: user.farmer_profile)
- Role-based redirects without extra libraries
- Django messages framework

Chowdhury Nabil Ahmed - Frontend (UI/UX)

Modules / Features:

- Base layout - Navbar, dropdown, flash messages
- Home page - Category showcase
- Registration - Dynamic role-switching form
- Product Listing - Filters and product cards
- Farmer Dashboard - Product table
- Cart Page - Quantity controls and summary
- Profile Page - Avatar, tabs, stats
- Other pages - Login, edit product, buyer dashboard

Files:

- base.html - Shared layout
- home.html - Landing page
- register.html - Dynamic form
- login.html - Login UI
- products.html - Product listing
- farmer_dashboard.html - Dashboard
- edit_product.html - Edit form
- cart.html - Cart page
- profile.html - Profile page

Key Challenges:

- Maintaining consistent UI without framework
- Make bridge between backend and frontend
- Responsive profile layout
- Correct use of Django template tags

Learned:

- Template inheritance ({% extends %}, {% block %})
- Role-based UI rendering via context
- Building tabs with HTML/CSS/JS
- Importance of design consistency

Md Sajib Ahammad- Database

Modules / Features:

- ERD design
- 6 Models - FarmerProfile, BuyerProfile, Category, Product, Cart, CartItem
- Relationships - OneToOne & ForeignKey
- 4 Migrations for schema evolution

Files:

- models.py - Model definitions

Key Challenges:

- Choosing correct field types (example: DecimalField for price)
- Setting on_delete=CASCADE for integrity
- Fixing early import error
- Managing schema updates without data loss

Learned:

- Converting ERD to Django models
- Using migrations for incremental updates
- OneToOneField vs ForeignKey usage
- Reverse queries with related_name
